

# Salamander Active Directory

Take the manual processes out of managing your systems and focus on what's important

Automatically updates from all UK and many overseas management systems.

Salamander Active Directory sits at the core of your school to ensure your network and relevant accounts, groups and permissions are always up-to-date. Everyone has the access they need to the resources they use as soon as they need to start learning or teaching. Salamander is fully customisable, fits your structures and follows your conventions.

“ Salamander is the best money I have ever spent. I never need to worry about user creation ”

Liam, ICT Manager, Wigan

# Salamander SharePoint

Online learning your way.

Take the weight out of school work.

**Automatically updates from all UK and many overseas management systems.**

Whether your SharePoint is completely in Office 365, on your school premises or a mixture of both, we can transform it into a learning environment. With over 10 years of experience, there's little we can't automate and build directly from the data in your management system.

Salamander SharePoint is fully customisable to reflect your school's needs and automatically manages all of your classes, subjects, teachers and pupils in a consistent manner, unique to your school.

## **Bring learning to life with Salamander and OneNote**

Automatically create OneNote notebooks with your defined templates and structures. Pupils create interactive and collaborative projects with simultaneous teacher feedback.

“ It's bringing teaching and learning alive ”

**David Clarke**, Assistant Headteacher,  
Hardenhuish School, Chippenham
